Office Action Summary

Application No.

10/763,483

Applicant(s)

RAJKOTIA ET AL.

Examiner

Erika A. Gary

Art Unit

2617

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11/20/06.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-24 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-24 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 23 January 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kelley et al., US Patent Number 6,822,973 (hereinafter Kelley) in view of prior art made of record in the first Office Action, Jang et al., US Patent Application Publication Number 2005/0007973 (hereinafter Jang).

Regarding claims 1, 7, 13, and 19, Kelley for use in a wireless network, a base station capable of controlling the use of the reduced slot cycle mode by a selected one of a plurality of mobile stations communicating with said base station, said base station comprising: a message controller capable of transmitting a Page message to a first mobile station notifying said first mobile station that a data session between said base station and said first mobile station is being activated; and a reduced slot cycle controller coupled said message controller capable of receiving from said first mobile station a Page Response message comprising a minimum reduced slot cycle index (SCI) value requested by said first mobile station, wherein said reduced slot cycle controller, in response to receipt of said Page Response message, causes said

Art Unit: 2617

message controller transmit said first mobile station a Release Order message comprising a selected slot cycle index (SCI) value at which said first mobile station will operate [figs. 2, 4, 5; col. 2: lines 28-67; col. 3: lines 3-30; col. 4: lines 1-12; col. 6: lines 1-3; col. 7: lines 24-26; col. 7: line 23 – col. 8: line 6].

What Kelley does not specifically disclose is that the Release Order message comprises a modified data field containing a selected reduced slot cycle index value. However, Jang teaches this limitation [paragraphs 0020, 0038, 0042].

Kelley and Jang are combinable because they are from the same field of endeavor, that is, controlling the use of a reduced slot cycle mode. At the time of the invention, it would have been obvious to one of ordinary skill in the art to modify Kelley to include Jang. The motivation for this combination would have been to specifically point out the signaling messages used to convey the reduced SCI value granted based on the value requested.

Regarding claims 2, 8, 14, and 20, Kelley discloses a slot cycle duration corresponding to the selected SCI value transmitted by the base station is different than a slot cycle duration corresponding to the minimum reduced slot cycle index (SCI) value requested by the first mobile station [col. 5: lines 36-44].

Regarding claims 3, 9, 15, and 21, Kelley discloses the slot cycle duration corresponding the selected SCI value transmitted by base station is at least as great as a slot cycle duration corresponding the minimum reduced slot cycle index (SCI) value requested by the first mobile station [col. 7: lines 38-41].

Regarding claims 4, 10, 16, and 22, Kelley discloses the page response message further comprises a requested time period during which the first mobile station will operate using the reduced slot cycle index (SCI) value requested by the first mobile station, and wherein said Release Order message further comprises a selected time period during which the first mobile station will operate using the selected SCI value [col. 5: lines 35-44].

Regarding claims 5, 11, 17, and 23, Kelley discloses the selected time period transmitted by the base station is different than the requested time period requested by the first mobile station [col. 5: lines 42-44; col. 8: lines 42-54].

Regarding claims 6, 12, 18, and 24 Kelley discloses the selected time period transmitted by the base station is at least as great as the requested time period requested by the first mobile station [col. 8: lines 10-18].

Response to Arguments

3. Applicant's arguments with respect to claims 1, 7, 13, and 19 have been considered but are moot in view of the new ground(s) of rejection.

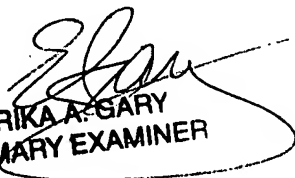

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erika A. Gary whose telephone number is 571-272-7841. The examiner can normally be reached on Monday-Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold can be reached on 571-272-7905. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
